

Experience

Cyberwise

Ankara, TR (Hybrid)

Cybersecurity Consultant

May 2026 – Present

- **Deploy** and **configure** enterprise security tools across **DLP**, **PAM**, and **DSPM** domains for clients in **critical** sectors including **defense, government, and energy**
- **Lead DSPM (Data Security Posture Management)** implementation projects for enterprise clients
- **Partner** with clients to translate security requirements into technical solution designs across **DLP**, **PAM**, and **DSPM** implementations

TEI - TUSAŞ Engine Industries, Inc.

Eskişehir, TR

Security Engineer

May 2023 – Feb 2026

- **Architected** a multi-tiered **high-availability** email security infrastructure; **deployed DKIM, SPF, and DMARC** protocols to strengthen phishing defenses.
- **Reduced** phishing clicks and compromise rates by **%78 and %88** respectively, while **increasing threat reporting** by **%171** for **2,700+ users**.
- **Established** a corporate **Vulnerability Management Governance** program by defining **Security SLAs** and **risk-based remediation** processes.

Inovako

Remote

Frontend Engineer

Jan 2023 – March 2023

- Developed responsive web interfaces and R&D prototypes using Streamlit and React.js to enhance user experience across multiple industries.

TÜBİTAK

Remote

Intern Researcher

Aug 2022 – Jan 2023

- Integrated AI modules into the "VALU3S" project web platform to automate testing processes and improve efficiency.

Education

Osmangazi University

Eskişehir, TR

Master of Science in Computer Engineering (Information Security)

2024 - Present

Thesis: Security Architecture for Enterprise Large Language Models (Ongoing)

Research Focus: Cryptographic accumulators and cuckoo filters for scalable, verifiable authentication of LLM agents.

Osmangazi University

Eskişehir, TR

Bachelor of Science in Computer Engineering

2018 - 2023

Thesis: CleanAI - White-box Testing Library for Assessing AI Model Quality.

Projects & Publications

Security Architecture for Enterprise LLMs (Master's Research)

- **Combining cuckoo filters** and **cryptographic accumulators** to build a scalable, verifiable authentication method for LLM agents.

ChArIoT Web Platform (IEEE Publication, Oct 2023)

- Built a cloud-based software testing platform using React.js and Docker for automated industrial safety validation.

CleanAI Library (IEEE Publication, Nov 2023)

- Created a white-box testing library for DNN reliability, implementing coverage metrics for structural analysis.

Skills & Interests

Cybersecurity: Zero-Trust Architecture, AI Security, Email Security, PAM, DLP, Data Security, Vulnerability Management, Active Directory Hardening, Security Awareness Training.

Tools & Infrastructure: Python, Docker, n8n, nmap, SIEM/SOAR concepts, Linux/Bash, SQL.

Interests: Strategic Cybersecurity Research, AI Ethics, Public Speaking.
